SKILLS

- Unreal Engine 4/5
- UE Blueprints
- C++
- Python
- Git
- Plastic SCM
- Anchorpoint

LANGUAGES

- English: Native
- Gaeilge: Native
- Deutsch: A2
- Español: A2

ABOUT ME

I'm a passionate game developer focused on crafting impactful, memorable interactive experiences. With strong skills in Unreal Engine (Blueprints, C++) and Python, I've built immersive worlds across 2D, 3D, and VR. I'm driven by curiosity, continuous learning, and collaboration. I look forward to the opportunity to contribute my skills and experience to your exciting projects.

EXPERIENCE

Unreal Engine Programmer — 2023 - 2026

Friendly Fire Communications GmbH

- Implemented camera systems, character movement, and interaction mechanics using both C++ and Blueprints.
- Created a custom level loading and websocket communication system in C++ to work alongside a platform agnostic streaming service.
- Produced custom Blueprint nodes in C++ for artists and developers for rapid prototyping and clarity for less technical team members.
- Optimized performance of high fidelity applications to run on Nvidia T4 GPU and 8GB RAM cloud streaming architecture using the UE profiler and console commands.
- Implemented tools with editor utility widgets and Python to decrease update times from a month to 2 weeks on live apps.
- Created a company wide build pipeline that vastly improved iteration speeds from 6 hours to 2.
- Conceptulized and developed an automated testing framework to ensure consistency from one build to another.
- Lead updates to active applications, completing a full product line update in 1 and a half months for the KTM configurator.
- Designed software architecture for new complex applications while considering previous workflow optimizations that could be utilised.
- Authored NPC companion AI using behaviour trees in UE.

EDUCATION

Msc. Interactive Media with 1.0 grade average — 2021 - 2023

Fachhochschule Oberösterreich

- Gained experience in Unreal engine and C++.
- Completed modules in graphics progamming in OpenGl and in level design and testing.
- Thesis was based on creating AI using Imitation Learning in Unity.

Bsc. Computer Science with First Class Honours (1.0) — 2017 - 2021

Technological University Dublin

- Gained foundational knowledge in progamming with C, C#, C++, Python, HTML, CSS and java.
- Completed modules in Game design and interactive app creation.
- Thesis was a local coop asymmetric VR and desktop game in Unity.

European Double Degree in Information Technology — 2019 - 2020

Hochschule Darmstadt

- Gained further knowledge in Python and foundational concepts surrounding AI and machine learning.

VOLUNTEERING

Fixtures Secretary — 2020 - 2022

Athlone Basketball Club

- Coordinated weekly across 12 leagues, 17 teams and 2 venues to schedule travel and game fixtures.
- Organised 250 basketball games in a 9 month time frame.
- Communicated with a diverse range of clubs and venues to ensure clear understanding.
- Optimised event schedules to meet tight deadlines while minimising costs.

Basketball Coach — 2014 - 2021

Athlone Basketball Club & Basketball Ireland
