ABOUT ME

I'm a passionate game developer focused on crafting impactful, memorable interactive experiences. With strong skills in Unreal Engine (Blueprints, C++) and Python, I've built immersive worlds across 2D, 3D, and VR. I'm driven by curiosity, continuous learning, and collaboration. I look forward to the opportunity to contribute my skills and experience to your exciting projects.

EXPERIENCE

Unreal Engine Programmer

FRIENDLY FIRE COMMUNICATIONS GMBH

2023 - 2026

- Implemented gameplay in C++ and Blueprints for camera systems, movement and interactions.
- Created a custom level loading and websocket communication system in C++ for better online streaming performance.
- Produced custom Blueprint nodes in C++ for artists and developers to use.
- Optimized performance of high fidelity applications to run on very limited cloud streaming architecture using the UE profiler and console commands.
- Implemented tools with editor utility widgets and Python to improve the production process.
- Created a company wide build pipeline that vastly improved iteration speeds.
- Conceptulized and implemented a testing framework to ensure consistency from one build to another.
- Lead updates to live applications, ensuring deliverables were produced on time for client deadlines.
- Designed software architecture for new complex applications while considering previous workflow optimizations that could be utilised.
- Implemented NPC companion AI using behaviour trees in UE.

Fixtures Secretary

ATHLONE BASKETBALL CLUB

2020 - 2022

- Communicated with multiple organisations and venues to ensure clear understanding.
- Optimized and scheduled events to fit within tight time frames and keep costs low.

Basketball Coach

ATHLONE BASKETBALL CLUB & BASKETBALL IRELAND

2014 - 2021

SKILLS

- Unreal Engine 4/5
- UE Blueprints
- C++
- Python
- Git
- Plastic SCM
- Anchorpoint

LANGUAGES

- English: Native
- Gaeilge: Native
- Deutsch: A2
- Español: A2

EDUCATION

Msc. Interactive Media
FACHHOCHSCHULE OBERÖSTERREICH
2021 - 2023

- Gained experience in Unreal engine and C++.
- Completed modules in graphics progamming in OpenGl and in level design and testing.
- Averaged a 1.0 grade across course work.
- Thesis was based on creating AI using Imitation Learning in Unity.

Bsc. Computer Science with First Class Honours (1.0)
TECHNOLOGICAL UNIVERSITY DUBLIN
2017 - 2021

- Gained foundational knowledge in progamming with C, C#, C++, Python, HTML, CSS and java.
- Completed modules in Game design and interactive app creation.
- Thesis was a local coop asymmetric VR and desktop game in Unity.

European Double Degree in Information Technology
HOCHSCHULE DARMSTADT
2019 - 2020

- Gained further knowledge in Python and foundational concepts surrounding AI and machine learning.
